**DETAILED ACTION**

***Specification***

The disclosure is objected to because of the following informalities: In the first paragraph of the specification, the applicant claims priority from an unknown application.

Appropriate correction is required.

***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

Species I – Fig. 1,3,5

Species II – Fig. 2,4,6

Species III – Fig. 7

Species IV – Fig. 8

Species V – Fig. 9

Species VI – Fig. 10

Species I is independent and distinct because it consists of a single frame member, which holds both the protective panel and the ornamental window. This frame has ventilation openings, which include a screen in order to deter insects, debris and water. The size of the ventilation holes is adjusted in order to incorporate the screens.

Art Unit: 3635

Species II is independent and distinct because it contains a protective panel, which is placed in a perimeter frame that is spaced apart from the ornamental window and its frame. This frame also includes the screened ventilation openings.

Species III is independent and distinct because it consists of the separate frames for the protective panel and the ornamental window. In this embodiment, the ventilation openings are covered with a hood, which takes the place of the screen.

Species IV is independent and distinct because the frame is no longer one single piece surrounding the protective panel. In this embodiment, the frame consists of sectional castings containing the ventilation openings, which are screened.

Species V is independent and distinct because the frame is shaped into a gothic portion with a rounded top. This frame also contains weep holes in the rounded portion to assist with water in the frame.

Species VI is independent and distinct because the rounded top portion come to a stop at an apex at the top of the frame, this is also a different gothic structure. The frame also contains weep holes to assist with water in the frame.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 3635

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
